### **Profile -**

Through the years I have found to understand how mature I am for my age. I've always wanted the best for myself and thrive on independency. During my adolescence I had many jobs that taught me a range of new attributes that i can bring to the table. Including but not limited to, productivity, great customer service abilities, organization and a keen mind for detail. I am known for working in a mature and professional manure, as well as enduring my energy through out my whole shift.
